

Job Posting

Position: PSYCHOLOGIST
Status: Full Time (1.0 FTE)
Sector: Community – Family Health Team
LHIN: Central West Local Health Integration Network (CW LHIN)
Region: Peel Region
Deadline: May 31st
Anticipated Start Date: July 2018

Queen Square Family Health Team (QSFHT) provides primary health care, including chronic disease management, health promotion and disease prevention, to a rostered population of patients in the city of Brampton and surrounding area. The FHT employs an inter-professional team of health care providers who work in a collaborative model of care.

In the recognition that mental illness and distress can lead to poorer health, shorter life expectancy, and poorer health-related quality of life, our Mental Health Team is in the process of developing a novel, evidence based, interdisciplinary, integrated model of primary mental health care for adults with a wide range of psychiatric disorders and mental health concerns.

Our unique model of primary mental health care recognizes the critical importance of evidence-based symptom screening, diagnostic assessment of psychiatric status & personality, and comprehensive psychosocial assessment in facilitating case formulation and an evidence based plan of care that relies on empirically supported psychotherapies. A critical element of our model of care is the ability to draw on the expertise of each discipline in the context of a collaborative partnership that enhances what any one practitioner/discipline can provide alone.

POSITION SUMMARY:

QSFHT is currently seeking a full-time clinical psychologist to work within our newly funded Mental Health Team. This is a unique opportunity to contribute to the development and implementation of a novel, evidence-based program that relies on best practices in primary mental health care and strategic partnerships across the circle of care.

Reporting to the QSFHT Executive Director, and working within his/her full scope of practice, the Clinical Psychologist will:

- provide clinical leadership, clinical supervision, clinical direction, & clinical mentorship to Team 2 Social Workers with respect to case formulation and treatment
- provide clinical leadership in case formulation to guide an integrated team plan of care
- provide diagnostic assessment of adults with known / suspected moderate to severe psychiatric disorders – including evidence based diagnostic semi-structured interviews such as SCID DSM V & psychometric assessment
- conduct risk assessment of suicidal ideation/behavior, homicidal ideation and / or self-harm
- formulate & communicate recommendations for clinical management and/or psychotherapeutic treatment
- provide clinical supervision in the administration & scoring of psychometric measures if required
- provide comprehensive & detailed recommendations for psychotherapeutic interventions as required
- provide clinical leadership, direction, mentorship, clinical supervision & training to our team of social workers with respect to delivery of evidence based psychotherapies including individual and group Cognitive Behavioral Therapy, Dialectical Behavior Therapy, mindfulness, etc.
- provide case specific consultation to other members of the diagnostic team including consulting psychiatrist, hospital based psychiatrist, family physician &/or Nurse Practitioner as appropriate

- communicate diagnoses and treatment / management plans & progress as required
- provide leadership in the identification of valid & reliable psychometric outcome measures
- document clinical care activities in the patient's EMR
- contribute to program planning, implementation and evaluation of mental health program
- collect data as required for statistical reporting purposes
- participate in team building, program development and quality improvement activities
- participate in team, program and FHT wide meetings
- adhere to organizational policies
- support and contribute to a healthy work place that embraces lifelong learning, diversity, clinical teamwork, privacy, and adherence to professional standards of practice
- perform other duties as assigned by the Executive Director

Clinical / Professional Competencies & Requirements:

- Ph.D. in psychology from an APA/CPA accredited clinical psychology program with a minimum of 3years experience working in an interdisciplinary clinical hospital-based or primary care setting with adults with anxiety, mood, concurrent and/or personality disorders
- registration with the College of Psychologists of Ontario in good standing with authorized practice in clinical psychology with adults
- proof of required professional liability insurance
- demonstrated skills in clinical teaching and clinical supervision since clinical teaching and clinical mentorship will be required
- additional experience in the treatment of adults with psychiatric illness and a history of childhood trauma would be considered an asset
- additional experience with older adolescents – 16 + would be considered an asset
- additional authorization to practice in rehabilitation psychology would be considered an asset
- additional clinical experience working adults with mild ETOH and/or substance abuse would be considered an asset
- content expertise in psychiatric disorders including chronic depressive disorders, bipolar disorder, anxiety disorders, schizophrenia and personality disorders is required
- skills in DSM V diagnosis of psychiatric disorders including chronic depressive disorders, bipolar disorder, anxiety disorders, schizophrenia and personality disorders is required
- experience in semi-structured clinical interviewing methodologies including SCID DSM V
- experience in the choice, administration and interpretation of psychometric assessment of psychiatric / psychological morbidity, personality and behavior to inform diagnosis, case formulation, treatment planning, psychotherapy, clinical management, and therapeutic outcomes
- knowledge of the cognitive and behavioral features that can impede integration into the community and symptom / functional recovery and quality of life
- experience in conducting suicide risk assessments
- experience in crisis management
- therapeutic skills relevant to a recovery model of care
- demonstrated experience in empirically supported individual and group psychotherapeutic modalities approaches in the treatment and/or clinical management of moderate to severe / chronic depressive disorders, anxiety disorders, and psychotic disorders – Cognitive Behavioral Therapy, Dialectical Behavior Therapy, Interpersonal Therapy / Cognitive Behavioral Social Skills, Illness Management & Recovery, and problem focused and/or mindfulness is required
- demonstrated skills and interest in providing care within an interdisciplinary shared care / collaborative care environment required
- demonstrated working knowledge of the Mental Health Act, the Health Care Consent Act, the Substitute Decisions Act and Community Treatment Orders
- excellent oral and written communications skills required
- advanced critical thinking skills and clinical decision making

- demonstrated ability to work both independently and collaboratively within an interdisciplinary shared care team
- demonstrated flexibility and ability to adapt to change
- demonstrated experience and skills in use of computer technology for clinical care
