

Psychologist, Psychological Associate, or Psychometrist needed for full time and part time work in a private practice in Toronto to complete psychological and diagnostic assessments. Job includes administration of a wide range of psychometric tests and preparation of written reports. The clients served are primarily preschool, school age children, and adolescents with a variety of developmental, socioemotional, behavioural, and learning disabilities, including Autism Spectrum Disorder and Attention Deficit Hyperactivity Disorder.

TO BE CONSIDERED, CANDIDATES **MUST** MEET THE FOLLOWING MINIMUM REQUIREMENTS:

- A Masters or Doctoral degree in Psychology. Preference for individuals qualified for registration with The College of Psychologists of Ontario. Supervision for registration is readily available.
- **Training, course work, and experience in the administration and scoring of psychometric tests to children and adolescents**
- Completion of practicum and/or internship
- Demonstrated ability in writing comprehensive psychoeducational reports
- Appropriate references to be made available upon request

Successful candidates will have outstanding interpersonal skills, experience with pre-school and school age children, psychometric tests and interpretation, and report writing, as well as an interest in further training and self-development. Post-graduate training, as well as direct relevant work or practicum experience, are absolute prerequisites in order to be considered. Experience with Autism Spectrum Disorders is preferred.

Please email typed resumes, including a list of tests with which you have experience, to Carla Freedman, Office Manager.

Only qualified candidates will be contacted for interview.
