Psychologist - With Expertise in ADHD

Centre for Integrative Mental Health

Location: Oakville, Ontario

We are seeking a psychologist for an exciting opportunity in a new mental health clinic. We are a multidisciplinary clinic working primarily in ADHD across the lifespan - in childhood, adolescence and adulthood. Of course we assess and treat all of the comorbid conditions that come along with ADHD too.

Our team includes a Psychiatrist (child, adolescent and adult), a Social Worker, a Naturopathic Doctor, and great admin staff. Our new clinic is professionally decorated and provides an upbeat and comfortable environment to work in, and treat people who have been struggling in their lives.

The successful candidate must hold a PhD or Masters in Psychology, and must be registered in the Province of Ontario. There should be demonstrated evidence of providing excellent psychoeducational and psychological assessments, as well as training and experience with evidence based psychotherapy (CBT or a similar evidence based modality).

Job Summary:

We are a new clinic, established in 2018. Our goal is to provide world-class assessment and treatment for people living with ADHD and comorbid conditions. There is a significant shortage of services for children, teens and adults who need assessment for ADHD and treatment. Our team members are able to work together, and this provides exciting opportunities to provide comprehensive assessment and treatment for our clients.

Since we are new and growing, this opportunity will provide the successful candidate the opportunity to help shape the development of this clinic. We would welcome your experience and expertise, as we devise the best service models to help our clients. As the clinic grows, there will be opportunities to supervise psychometrists - to help to service more clients who need our help. If you are able to help supervise training psychologists, this would be welcomed as well.

Your responsibilities will include:

- Conducting Psychoeducational/psychological assessments, interpreting results and writing comprehensive reports
- Providing evidence based psychotherapy
- Collaborating with other team members as needed
- Program/clinic development

Your Qualifications:

- A PhD or Masters degree in Psychology
- Registered with the College of Psychologists of Ontario
- Competency in psychological assessments in children/teens and adults (it's preferred to have competency in all age ranges, though not necessary)
- Experience with ADHD, as well as other psychological/psychiatric disorders
- Training and experience in an evidence based psychotherapy (such as CBT)

Remuneration:

- We will provide an income split - ie a portion of your billings will go to the clinic overhead
- You will be an independent provider in the clinic - and we will help with the marketing and administration of your services

We are looking for someone with an upbeat and energetic approach to join our team. Having a growth mindset and focusing on strengths is critical for us. Great communication skills and the ability to work with and support fellow team members is expected.

Please provide a cover letter and your CV to: clinic@cfimh.com

You can call our clinic (if needed) at 905-845-8850
