

Kaplan and Levitt Psychologists are hiring psychologists and psychological associates

We are looking for members of the College of Psychologists of Ontario with competence in clinical, rehabilitation, and neuropsychology. We are interested in meeting both senior clinicians as well as those who are embarking on supervised practice to work as a part of our team.

Clinicians at Kaplan and Levitt Psychologists have a wealth of experience in a variety of areas, and we are always learning from each other in a collegial and supportive environment. We offer ongoing mentorship in all areas of our practice including assessment and treatment, expert legal assessment, and advocacy work educating psychologists, government, and others about psychological services and the issues patients face. If you seek growth, complexity and challenge in your work in a congenial supportive environment, you will find it at Kaplan and Levitt.

Clinicians carry a case load of assessments as well as conducting treatment and rehabilitation. We are often able to work intensively with our patients, providing a range of services over the different stages of their treatment, recovery, and rehabilitation. We are able to include spouses/partners and children in our care. We work closely with their other health and rehabilitation providers outside the clinic. We work in the auto insurance and WSIB sectors where we also are engaged in advocacy at the Provincial level. Each system provides unique opportunities for intensive rehabilitation of injured and traumatized patients and roles for the psychologist. Having carried out thousands of disability, tort, and catastrophic impairment assessments, we are knowledgeable about the unique challenges of psycho-legal practice.

Practicing in Hamilton for four decades, we can attest that this is a wonderful community in which to practice and to live. You will enjoy living and working here.

Whether you are an early career clinician or have considerable experience, if you think you may be a good fit with our practice, and want to learn how you can achieve your career goals; please send a current CV and two de-identified samples of assessment reports for treatment planning or consultation, along with a cover letter introducing yourself to ron@kaplanandlevitt.com.

Dr. Ron Kaplan
