

KAPLAN & LEVITT

PSYCHOLOGISTS

Kaplan and Levitt Psychologists is hiring full-time Registered Psychologists and Psychological Associates with competence in clinical, and/or rehabilitation, and/or neuropsychology.

We are also interested in hiring full-time Psychologists who are embarking on supervised practice with the College of Psychologists of Ontario.

We assess and treat injured and traumatized patients in the auto insurance and WSIB sectors, where we also are engaged in advocacy at the provincial level. We provide compassionate and individualized, patient-centred evidence-based treatment services, using an integrative therapeutic approach to best tailor treatment to our clients' needs. We offer ongoing mentorship in all areas of our practice including assessment and treatment, expert legal assessment, and advocacy work educating psychologists, government, and others about psychological services and the issues patients face. Previous experience within auto insurance and WSIB sectors is an asset, but not required.

If you seek growth, complexity and challenge in your work in a congenial supportive environment, you will find it at Kaplan and Levitt. We meet for weekly, hour-long peer supervision team meetings to provide support and promote professional development. We also have a team of dedicated full-time intake and administrative support staff.

Kaplan & Levitt Psychologists continues to provide all of our usual psychological patient assessment and treatment services during the COVID-19 pandemic, whether by telephone or secure video conferencing. For the time being we will not be seeing patients in our offices.

Whether you are an early career clinician or have considerable experience, if you think you may be a good fit with our practice, please send a current CV and two de-identified samples of assessment reports for treatment planning or consultation, along with a cover letter introducing yourself to ron@kaplanandlevitt.com
