

NOCD is an award-winning digital health company that serves the largest community of people with obsessive-compulsive disorder (OCD) in the world. Universally, there is a lack of access to high-quality OCD care. By combining evidence-based treatment with the power of technology, we are working to connect the more than 181 million people with OCD around the globe to effective therapy online.

On the NOCD teletherapy platform, members work with qualified therapists through live video sessions and have access to peer support communities and therapeutic tools. Researchers at Columbia Medical Center found our evidence-based Exposure and Response Prevention (ERP) protocol reduced OCD symptoms by 47%.

We are looking for passionate, part-time Clinical Psychologists with unrestricted licenses in Ontario to join our mission of making effective OCD treatment accessible. This is an extraordinary opportunity to make a lasting impact in the field of mental healthcare.
